**DETAILED ACTION**

***Amendment to Specification***

1. The amendment to the specification filed 23 June 2003 has been entered. However, it does not alleviate the grounds for objection to the specification, as explained below.

***Drawings***

2. The proposed substitute sheets of drawings, filed on 23 June 2003 have been disapproved.

a. In Fig. 3, the reference sign "7" for "shaft screws 7" has been removed and not replaced.

b. Also the lead line for "109" has been eliminated from Fig. 9. See 37 CFR 1.84(q) regarding lead lines.

A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

Because numerous partial sets of corrected drawings have been filed through out prosecution, a single complete set of corrected drawings should be submitted in response to this office action, so that it may be clear on the record what set of drawings the examiner has approved.

***Specification***

3. The disclosure is objected to for the following reasons:
  - a. In the amended version of the paragraphs which were originally page 5 line 8 to page 6 lines 1-16, applicant attempted to amend reference characters to be consistent with the drawing changes and to eliminate using the same reference sign to designate two different parts. However, in numerous cases, the original reference character was not deleted, so the text reads "4 4a" in numerous places.
  - b. Also, within the amended version of the paragraphs which were originally page 5 line 8 to page 6 lines 1-16, "shaft screws 7" is recited, though "7" is used to designate the "feed housing". Also "base 3" is still recited. Also "all teeth 4 and 5" is still recited.
  - c. While applicant has amended two paragraphs of the specification, all instances of the same reference sign being used to designate different parts must be corrected throughout the specification. See especially:
    - page 6, line 28: "shaft screw 7"
    - page 6, line 29: "shaft screw 7"
    - page 7, line 13: "teeth faces 5 and 4"
    - page 7, line 26: "Shaft components 1"
    - page 7, line 30: "shaft components 1"
    - page 8, line 15: "teeth 5" and
    - page 9, line 8: "screw 8".
